Professional Summary

Computer Science student and aspiring Full Stack Developer with hands-on experience building software and hardware-integrated projects. Skilled in C#, C++, Python, JavaScript, SQL, and Object-Oriented Programming (OOP), with a growing focus on the .NET ecosystem and web development. Familiar with Agile development practices and version control workflows (Git). Recognized by IEEE for an applied engineering project combining embedded systems and sustainable agriculture. Strong problem-solving skills, fast learner, and advanced user of Microsoft Office.

Education

Bachelor of Science in Computer Science
Faculty of Computer Science, Nahda University
GPA: 3.2

Projects

EcoGrow AI – Smart Agriculture System *2025*
Personal / Academic Engineering Project

- Designed and built a smart irrigation and environmental monitoring system using Arduino UNO/Nano as the core controller, applying Object-Oriented Programming principles to structure sensor and actuator control logic.
- Integrated DHT11 temperature/humidity, soil moisture, ultrasonic, and LDR sensors with servo motor, relay, water pump, and fan actuators to automate irrigation and environmental control, reducing manual monitoring effort.
- Implemented a solar-powered architecture using a 12V solar panel, charge controller, and battery, enabling sustainable off-grid operation with an I2C LCD for real-time system feedback.
- Followed an iterative, Agile-style development approach, testing and refining sensor calibration and control logic across multiple build cycles.
- Currently developing an AI-based model to analyze soil conditions and predict plant/soil health, extending the system from automated control toward predictive analytics.

Honors & Recognition

IEEE Recognition – EcoGrow AI Project *November 2025*
Antenna and Microwave Approaches for Sustainability
IEEE MTT-S Egypt Chapter, IEEE APS Egypt Chapter & ERI

- Recognized for presenting the EcoGrow AI project and demonstrating the practical application of embedded systems and sustainable technology in agriculture.

Technical Skills

Programming Languages: C#, C++, Python, JavaScript
Core Concepts: Object-Oriented Programming (OOP), Agile Methodology
Web Development: HTML, CSS
Frameworks: .NET (Currently Learning)
Databases: SQL
Tools & Practices: Git, GitHub, Agile Development
Software: Microsoft Office (Advanced) – Word, Excel, PowerPoint

Languages

Arabic: Native
English: Good Working Proficiency
